

Single Deck Roller

SDR-65 / SDR-90 **Roller Finishing Mower**

High Performance - Full Featured

The Progressive **SDR-65** and **SDR-90** are a three point hitch versions of the popular tri-deck TDR-15 and TDR-22 mowers and they utilize many of the same components. Not to be confused with other, light duty three point hitch mowers that are available, both the **SDR-65** and **SDR-90** have 6" diameter rollers on both the front and rear across the full width of the deck. Ideal for smaller mowing jobs where a quality cut is mandatory, the **SDR's** rollers allow you to cut as low as 1/2", while simultaneously striping and rolling the mowing surface. To minimize service requirements, both models are equipped with field proven maintenance free blade spindles and roller-end bearings.

If a new mower is in your plans to maintain your sports complex, park or other areas where a quality after cut appearance is mandatory, consider the 65 inch wide **SDR-65**. If a wider cutting swath for a seed bed or small test plot is required, consider the 90 inch wide **SDR-90**.

Progressive's **SDR** mowers are another example of the ingenuity and quality that goes in to producing durable, reliable rotary finishing mowers that are easy to maintain. They are "***The Better Built Choice***".

The Better Built Choice.™

Single Deck Roller

SDR-65 / SDR-90 Roller Finishing Mowers

Easy height adjustment:

Infinite cutting height adjustment from ½" to 4".

Using the supplied tool the mower cutting height can be adjusted quickly for multiple mowing applications. The SDR-90 can be fitted with either one piece fixed blades or the replaceable tip Pro-Ez II blade system

Full width rollers:

Each 6" diameter, thick wall rollers with 'Hex' shaft ends is supported by two 1¼" ductile iron flange bearings.

A cable wiper is position by each roller to eliminate grass build-up in damp mowing conditions.

Heavy duty lift link:

Designed with a standardized Cat 1, 3 point lift linkage Reinforced, heavy duty mounting points on the mower deck for long life. (may need weights on front of tractor)

Simpler Maintenance = Lower Cost:

Maintenance Free Blade Spindles and sealed roller-end bearings are used to lower both the cost and time spent on routine maintenance. They also provide peace of mind that a missed daily greasing won't render the mower out of service.

SDR Roller Finishing Mower Specifications

	SDR-65	SDR-90
Part Number:	531965	531990
Cutting Width:	65 inches	90 inches
Blades:	3 x 23 inches long	4 x 24 inches long
Cutting Height: (infinite number of settings)	½" to 4"	½" to 4"
Mowing Capacity: 2 mph	1.25 acres / hour	1.8 acres / hour
4 mph	2.5 acres / hour	3.56 acres / hour
6 mph	3.75 acres / hour	5.33 acres / hour
Recommended PTO HP:	25 HP	35HP
Transport Width:	72 inches	92 inches
Weight:	975 lbs	1380 lbs.
